Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 8 and 14 are finally rejected under 35 U.S.C. 102(b) as being anticipated by Akeret (US 4,747,484). Akeret discloses a disc case, which encloses a disc-shaped recording medium, comprising a disc accommodation part for accommodating the disc-shaped recording medium. An opening part 60 for exposing a part of the disc-shaped recording medium to the outside the disc case as shown in Figure 1; and an elastic deformation part 24 of a cantilever structure for holding the disc-shaped recording medium and capable of being deformed outside of the disc case to take out the disc-shaped recording medium from the disc case or store the disc-shaped recording medium in the disc case. A fixed flange part 22 for holding the disc-shaped recording medium in co-operation with the elastic deformation part. The elastic deformation is provided with a regulating wall which is any of the wall surface on element 24.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3728

4. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ackeret. Ackeret discloses a tip with a slight rounded surface instead of the slanted surface as claimed. However, it is within the knowledge of one of ordinary skill in the art to provide any variety of shapes and sizes for the tip as long as it enters the thickness of the disc case.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
